---

In response to the increasing global energy demand and the need to reduce fossil fuel dependence, multi-energy microgrids (ME-MGs) have emerged as a sustainable and efficient ...

These uncertainties pose substantial challenges to achieving reliable, economical, and flexible microgrid scheduling. This paper proposes a robust multi-time-scale scheduling framework ...

NLR develops and evaluates microgrid controls at multiple time scales. Our researchers evaluate in-house-developed controls and partner-developed microgrid components using software modeling ...

As traditional power grids are unable to meet growing demand, extensive research on multi-microgrid scheduling has begun to address the issues present in conventional power grids. ...

For this reason, this article proposes a microgrid multi-timescale optimal scheduling method based on new energy output scenario generation.

To this end, this paper proposes an intelligent scheduling framework based on reinforcement learning and data-driven optimization to improve the adaptability of microgrids to uncertainty and multi ...

Aiming at the problem of power fluctuation caused by power prediction error in microgrid dispatching process, this paper proposes a day-ahead and intra-day dual-time scale power ...

The purpose of this paper is to review the progress of intelligent optimal scheduling in new microgrids, and to discuss the technical challenges in multi-energy integration, real-time optimization, ...

Genetic Algorithm generates demand response strategies and optimizes battery dispatch, while LightGBM forecasts solar power generation and building load consumption. The approach aims ...
