If signed into law, it would eliminate the federal Investment Tax Credit for residential solar by the end of this year - a move that could make solar harder to afford and slow down progress on...

Behind California's solar success lies a web of corruption--land grabs, favoritism, and even romantic ties between insiders and lobbyists. Clean energy, it turns out, isn't always clean ...

More than 20 states sued the EPA on Thursday, challenging its cancelation of a \$7 billion program that aimed to make solar power accessible to low-income households.

As solar panels sit in dumps, the toxic metals they contain can leach out into the environment and possibly pose a public health hazard if they get into the groundwater supply."

PHILADELPHIA -- The solar power industry is booming and that growth helps the world meet its climate goals by replacing fossil fuels. But an emerging problem in the U.S. solar business ...

Solar panels and their associated batteries can pose fire and electrical risks, especially if installed incorrectly. The U.S. Fire Administration documented a 15% increase in residential fires ...

The latest draft of the bill is broadly negative for clean energy, but it is particularly damaging to residential solar, cutting federal tax credits far sooner than expected.

Is now a bad time to buy solar panels? It might be a bit of a slow period for the solar industry, but that doesn't mean you should delay a solar installation on your own home.

Solar energy is a rapidly growing market, which should be good news for the environment. Unfortunately there's a catch. The replacement rate of solar panels is faster than ...

In late 2023 alone, more than 100 residential solar dealers and installers in the U.S. declared bankruptcy,

Bad news for solar panels

according to Roth Capital Partners--six times the number in the previous three ...
