There is not yet a modern 5G network in Chad (as of 2024). The penetration of 4G, i.e. mobile communications with at least LTE speed, recently stood at 60%. Conversely, 8.12 million people in ...

These data can be visualized by applying filters by technology (no coverage, 2G, 3G, 4G, 4G+, 5G) over a configurable period (only the last 2 months for example). It's a great tool to track the deployment of ...

While 2G coverage reached 86.8%, 5G is yet to be deployed in Chad. This infrastructure upgrade aims to improve service quality amidst a recent decline in telecom availability.

The service does not rely on Chad's fragile national backbone, instead linking directly to satellites, which could make internet access in Chad more resilient to terrestrial outages.

The map above comes from Ookla's Speedtest Intelligence and shows where in the world you can 5G mobile phone coverage and when the infrastructure was first built.

As Chad continues to expand mobile broadband access, digital inclusion initiatives, and national ICT development efforts, structured market research is essential to support realistic, phased, and ...

Check the compatibility of frequencies, bands and network coverage of your smartphone with the operators of Chad. If you have ever wondered if the mobile you are thinking of buying will work in ...

Research actively monitors the Chad 5G Infrastructure Market and publishes its comprehensive annual report, highlighting emerging trends, growth drivers, revenue analysis, and forecast outlook.

NOTE: The information regarding Chad on this page is re-published from the 2021 World Fact Book of the United States Central Intelligence Agency and other sources.

5G is the fifth generation of mobile phone communications standards. It is a successor to 4G and promises to

Does Chad have 5G base stations

be faster than previous generations while opening up new uses cases for mobile data.
