The latest news in energy storage from Power Engineering including updates on storage projects, technology, programs, and prices.

Improved carbon-cement supercapacitors could turn the concrete around us into massive energy storage systems. Explosive growth of AI data centers is expected to increase greenhouse ...

The battery energy storage market continues its rapid growth, reshaping power systems worldwide. After a historic 2025, when global BESS capacity surpassed 250 GW and overtook ...

Energy storage is expected to play a significant role in enabling the global data centre build-out, although the commercial and financing models developers will use are evolving, Energy ...

Latest news on energy storage projects, BESS, capacity expansion, and regulatory updates across Europe, US & Canada, Latin America, and Asia Pacific. Discover how energy storage ...

Get the latest updates on battery tech, grid-scale storage & green energy - with trusted news, trends & expert commentary

Global demand for energy storage is surging. Lithium-ion leads today, but new contenders like sodium-ion, flow, and gravity systems are shaping the future grid.

Ford pulls back from large battery-only electric vehicles to concentrate on hybrids, smaller, affordable EVs, and grid-scale battery storage. CES, PowerGen, APEC, and DTECH will spotlight solutions for ...

Sweden's Volvo Cars has halted operations at its battery startup Novo Energy, which had already been sharply scaled back, as its search for a partner drags on, Novo Energy said on Tuesday.

Energy affordability has long been a problem for the poorest Americans, but now middle-income families are

Energy Storage New Energy News

starting to feel the squeeze. "The system is changing faster than the infrastructure...
