Even though Fiji is an emerging solar market, it enjoys a good presence of solar equipment suppliers. Some readily available equipment in Fiji includes solar panels, batteries, inverters, and charge ...

"The system runs directly from solar, pumping water through the day. The high efficiency means enough water is pumped during the day and can be stored in a tank for night time use if needed.

Solartech permanent magnet solar borehole water pump provides a strong guarantee for irrigation water for small-scale farms in islands without power grid coverage in Fiji.

The solar water pumps operate in the daytime during normal sunshine hours and automatically switch off at sunset. This allows the borehole to replenish its water level before pumping starts the next day.

In an interview at the SolarX Startup challenge workshop in Nadi yesterday, Ro Filipe said they were also working closely with the International Solar Alliance on providing solar-powered ...
