Finland's utility-scale solar capacity soared in 2025, adding a record 227 MW. The article covers major projects like Utajärvi, Europe's northernmost large-scale park in Simo, upcoming ...

Finland's large-scale solar capacity more than doubled in 2025, buoyed by the commissioning of the country's first solar projects larger than 50 MW. Another record year for ground ...

Thanks to its cool climate, abundant land, and solar radiation levels on par with northern Germany, Finland is unexpectedly well-suited to solar - especially when paired with wind, which peaks in winter ...

When solar power is combined with energy storage and smart grid technologies, it improves the flexibility of the electricity grid. Solar panels can be installed in many different ways on ...

Read about solar power production, its costs and environmental effects and the project development of the solar power plant. Renewables Finland currently maintains three up-to-date lists and statistics ...

The share of solar power in Finnish electricity production is approaching one percent and won't stop there: plans are in place to build several solar farms in Finland, each with hundreds of ...

The 70 MW Simo solar park, developed by Exilion Tuuli Ky and Solarigo Systems Oy, was also commissioned last year, marking the first utility-scale solar project in Finnish Lapland and ...

Explore the rapid growth of solar power in Finland, backed by EUR16.6M in subsidies. See how Finland's solar energy strategy is paving the way to carbon neutrality.

With long daylight hours in summer and a growing focus on green technology, Finland is becoming increasingly relevant for solar energy applications, particularly in urban and smart energy sectors.
