-----

The world of renewable energy has reached a new milestone with the activation of the largest wind turbine to date.

Its wind turbine is so big that the Tour First, France's tallest tower, could fit between its whirling blades and still have room to spare. The name of this powerful machine is Qihang, and it has ...

This is a list of the most powerful wind turbines. The list includes wind turbines with a power rating that is within 5 MW of the current most powerful wind turbine that has received customer orders that is at ...

With fewer obstructions and larger available spaces, these super-turbines can harvest wind energy 24/7 with minimal downtime. GE began testing the Haliade-X in 2019 in Rotterdam, ...

List of largest wind turbine models, based on rotor diameter and wind turbine sizes. Learn how different models of wind mills impact energy production.

News about switching to greener energy sources is always good news, and this certainly counts: The world's largest wind turbine constructed to date is now up and running and contributing ...

With the construction of the world's largest wind turbine, China has not only set a record but also underscored its strategic dominance in the clean energy sector.

With a capacity to generate 15 megawatts of power, the Vestas V236-15.0 MW is the largest and most powerful wind turbine as of 2025 to have been commercially deployed.

Thanks to consistently strong winds out at sea, these turbines can produce energy more reliably and efficiently than onshore wind turbines.

These massive blades are destined for installation on what is expected to be the world's most powerful

# Giant wind turbines

offshore wind turbine, a 26-megawatt (MW) unit being developed by Dongfang Electric...
