Energy storage installations globally will keep gaining momentum over the next decade as other markets pick up pace. BloombergNEF expects cumulative energy storage capacity in 2035 ...

The global energy storage market added 175.4 GWh of installed capacity in 2024, with the three major regional markets--China, the Americas, and Europe--continuing to account for over ...

In the first three quarters of 2024, newly operational non-hydro energy storage installations reached 20.67 GW/50.72 GWh, representing year-on-year growth of 69% in power ...

The global energy storage system market size stood at USD 17.9 billion in 2026, growing further to USD 80.76 billion by 2035 at CAGR of 17.8%.

Find the latest statistics and facts on energy storage.

The global energy storage systems market recorded a demand was 222.79 GW in 2022 and is expected to reach 512.41 GW by 2030, growing at a CAGR of 11.6% from 2023 to 2030. Growing demand for ...

The energy storage systems market size exceeded USD 668.7 billion in 2024 and is expected to grow at a CAGR of 21.7% from 2025 to 2034, driven by the rising demand for grid stabilization and energy ...

Two primary storage technologies, namely pumped hydro and battery energy storage systems (BESS), emerge as pivotal low-carbon storage technologies that complement renewable energy assets.

The global energy storage systems market size was estimated at USD 266.82 billion in 2024 and is predicted to increase from USD 288.97 billion in 2025 to approximately USD 569.39 ...

Global installed energy storage capacity by scenario, 2023 and 2030 - Chart and data by the International

Global Energy Storage System Market Capacity
