Prime Minister Brigadier (Ret'd) Mark Phillips on Saturday commissioned Guyana's largest hybrid solar-plus-storage power facility to date, a US\$10.4 million 5-megawatt solar photovoltaic (PV) ...

An investor planning a new solar module factory in Guyana faces a pivotal strategic choice. One path leads to the government-led initiative to bring electricity to remote hinterland ...

The Program is administered by the Inter-American Development Bank (IDB), and aligns with Guyana's Low Carbon Development Strategy. The initiative emphasizes climate-resilient renewable energy ...

Co-deposition of copper thiocyanate with perovskite on textured silicon enables an efficient perovskite-silicon tandem solar cell with a certified power conversion efficiency of 31.46% for 1 cm²

Key market players are focusing on research and development efforts to improve the stability and scalability of perovskite solar cells in Guyana's tropical climate. Government initiatives promoting ...

The general objective of the program is to support the diversification of Guyana's energymatrix towards the use of climate-resilient renewable energy sources in the electricity ...

The government has commissioned a new 3-megawatt peak (MWp) solar farm at Prospect Berbice in Region Six. The farm adds another tranche of renewable energy to Guyana's ...

The pioneering status of this project is an ideal opportunity for the program of the donor agency to assess its contribution to women's empowerment and to the renewable energy sector in Guyana.

The project will result in the installation of photovoltaic systems for 42 homes in the community, a joinery project, garden project, solar freezer for a village shope, and a cassava processing unit.

The GUY SOL project in region 10 has a timeline of 18 months, commencing in July 2025 and expected to

Guyana Perovskite solar Module Project

conclude in the first quarter of 2027. The project is funded under the Norwegian ...
