Does Telehouse Hanoi offer a virtual private server service?

The Telehouse Hanoi data centre offers a Cloud Virtual Private Server (VPS) service, to meet the increasingly diverse and evolving needs of its customers.

How secure is Telehouse Hanoi?

Telehouse Hanoi employs the latest security systems including Biometric sensors to authenticate the identity of visitors by verifying their finger-prints (Biometric equipment is located at the entrance to the co-location space), making it one of Vietnam's most secured data centres. Have any questions? Talk with us directly using LiveChat.

What certifications does Telehouse Hanoi have?

The Telehouse Hanoi data centre has been awarded the ISO/IEC 27001 Information Security Management Certification. This recognises our risk management system which covers the on-going management and implementation of security controls.

What makes Hanoi Telecom a great project?

Hanoi Telecom's project exemplifies the convergence of creativity and community-centric values. By infusing their initiatives with fresh ideas that address societal needs and promote environmental stewardship, they have garnered recognition from the program's organizers, emerging as one of the top 10 outstanding projects.

Highjoule's Site Battery Storage Cabinet ensures uninterrupted power for base stations with high-efficiency, compact, and scalable energy storage. Ideal for telecom, off-grid, and emergency ...

An uninterruptible power supply, commonly known as UPS Power Supply is easy to install a device that is designed to provide power to your computers, servers, server rooms and data centres in case of ...

3 Phase UPS power protection, solving today's energy challenges while setting the standard for quality and innovation with fully integrated solutions for enterprise-wide networks, data centers, mission ...

Hanoi solar telecom integrated cabinet uninterrupted power supply registration full work

Beyond mere fabrication, we offer a full turnkey integration, including structural design, internal module pre-assembly, wiring, and testing, therefore reducing the time of installation on the customer's site ...

The combination of solar modules, advanced batteries, inverters, and automatic switching creates a resilient emergency power system for telecom cabinets. This integration supports ...

An indoor photovoltaic energy cabinet is a compact, integrated energy storage system designed to be deployed inside telecom facilities. It combines lithium battery storage, PV input, and intelligent ...

Using UPS for Data center is the optimal solution to help ensure continuous and uninterrupted power supply 24/7, avoiding sudden power outages, voltage spikes, and electric shocks.

In the event of a power failure, the power supply can be maintained by the UPS system for 15 minutes and the diesel-driven backup-generator is able to run continuously without refuelling for 48 hours via ...

Hanoi Telecom, established on May 2, 2001, with a charter capital of 1.6 trillion VND, is the only private group in Vietnam that holds all the necessary licenses to operate in the telecommunications and ...

From modular architectures to climate-resilient components, modern Hanoi UPS uninterruptible power supply equipment design requires localized expertise. Whether you're protecting servers or ...
