The closure of numerous solar contractors in 2024 has sent ripples through various facets of the solar market, affecting customers, ongoing projects, and the industry.

The last decade has witnessed a significant increase in the development and implementation of green power by U.S. businesses and households. At the same time, between ...

Residential solar might be down today, but its long-term prospects remain solid. We see that residential solar is poised for steady growth, especially for companies that take the right steps ...

Last week, the Interior Department's Bureau of Land Management quietly changed the project's status to "canceled" on its federal permitting webpage.

Thousands of homeowners are left without repair services or support for systems installed by solar companies that later went bankrupt. California alone has over 820,000 abandoned ...

Thousands of homeowners are left without repair services or ...

Some homeowners may be better off going with their second or third choice of panel in order to get their project fully installed by the December 31, 2025 deadline to claim the tax credit.

A decade ago, someone knocking on your door to sell you solar panels would have been selling you solar panels. Now, they are probably selling you a financial product--likely a lease or a...

In many major markets, like California, bill credit rates for sending excess electricity to the grid have been slashed by 75% or more. Tariffs have posed challenges to the industry as well.

Is now a bad time to buy solar panels? It might be a bit of a slow period for the solar industry, but that doesn't

Has the photovoltaic panel been stopped now

mean you should delay a solar installation on your own home.

Ivanpah, the concentrated solar power facility in the Mojave Desert, is shutting down in early 2026.
