How many solar panels does a hotel need?

Hotels differ in size and the range of amenities offered to their guests, so their energy consumption also varies. Large hotels may need thousands of solar panels spread over several locations to meet their energy requirements. A small boutique hotel might require less than a hundred solar panels to power all operations.

Can a hotel switch to solar energy?

Hotels that switch to solar energy save money in the following ways: Reduced or eliminated utility bills: Solar is renewable energy. Once it goes live, a hotel starts saving on electricity and natural gas costs immediately. Once the solar system pays for itself, a hotel can have zero utility expenses if it runs entirely on solar power.
