What size is a 19 inch computer enclosure?

The housing width of 19 inches is a common size in the IT industry. These enclosures are often used in rack mounting, e.g. in data centres, to mount several computers or servers in a space-saving manner. Our 19-inch industrial PCs fulfil the standardised width of 19 inches (front panel width of 48.26 centimetres) and fit into any 19-inch rack.

Why do data centres need 19" racks?

Modern data centres fundamentally rely on 19" racks to ensure efficiency, security, and scalability. These racks offer critical advantages: Optimised Space Utilisation: They maximise floor space by allowing vertical stacking of equipment, enabling efficient management.

Can I use a 19 inch case as a desktop enclosure?

Our Instrument 19" cases are available as desktop enclosures or as portable enclosures fitted with a carry handle bar that doubles as a stand for desktop use. Our 19" rack mounted enclosures are available with removable or fixed front panels and ergonomic handles for comfortable installation in the rack.

What size machine room should a data center rent out?

Data centers rent out machine room areas of 60'x110 cm or 80'x120 cm (for deep server racks). This area can accommodate a server and peripherals with a total power of no more than 20 kW. For companies that operate a fleet of their own IT hardware: racks, servers, uninterruptible power supplies, PDUs - the rental cost is reduced.
