How is electricity sold in New Zealand?

Electricity is bought and sold on the wholesale market. There are about 330 participants in New Zealand's wholesale electricity market. The wholesale market is where generators sell electricity and retailers buy electricity. Retailers then on-sell that electricity to businesses and households across New Zealand.

How many wholesale companies are there in New Zealand?

There are about 80 generation companies, 62 retailers and 6 gentailers (generator-retailers) in New Zealand's wholesale market. The remaining wholesale market participants comprise distribution and network companies and traders in secondary markets, such as financial hedges.

Why do you need energy storage systems?

Our energy storage systems are compatible with storing energy from renewable sources, making them an ideal solution if you want to reduce fuel consumption of a diesel generator, add reliability to a hybrid system or microgrid, or to simply optimise your business case through smart energy management - our solutions are at your service!
