Has anyone here ever used C++'s `&quot;placement new&quot;`? If so, what for? It looks to me like it would only be useful on memory-mapped hardware.

How do I: Create a local branch from another branch (via `git branch` or `git checkout -b`). Push the local branch to the remote repository (i.e. publish), but make it trackable so that `git pull` and ...

China is making waves in the world of energy: embracing renewables at an unprecedented scale, decarbonizing its power grid (including phasing out sulfur hexafluoride (SF6) from the grid), and now ...

A graphical version manager where you would just add a tag for the new branch without dealing with what seems to me obscure and archaic syntax would be such a relief. My kingdom and ...

A new expression is the whole phrase that begins with `new`. So what do you call just the `&quot;new&quot;` part of it? If it's wrong to call that the `new` operator, then we should not call `&quot;sizeof&quot;`; the `sizeof` ...

It is NOT "bad" to use the `new` keyword. But if you forget it, you will be calling the object constructor as a

## New circuit breaker in China in Jordan

regular function. If your constructor doesn't check its execution context then it won't notice that "this" ...
