Yes, due to their high-temperature stability and chemical resistance, our fiberglass containers are ideal for use in autoclave sterilization processes where standard plastics would fail.

Insulated containers maintain a constant temperature to help protect temperature-sensitive materials during benchtop use, short- or long-term storage, or transport.

High temperature plastic containers are specially designed to endure extreme heat conditions that exceed the capabilities of standard plastic containers. These containers are made from robust ...

Extreme-temperature process totes and lids withstand large fluctuations and differentials in temperature. They store and cover hot items during transport from a production line.

Discover a list of materials that can withstand high temperatures, including metals, ceramics, and polymers. Explore heat-resistant options like tungsten, silicon carbide, PEEK, and more, ideal for ...

These polypropylene totes are chemically resistant to acids, alkalis, oils, and detergents. The tough, smooth surface won't chip and is m...

Guide to Selection and Testing Popular High-Temperature Plastics Key Factors That Affect The Performance in High-Temperature Environments Common Applications That Require High-Temperature Plastic Materials Tips For Testing Plastic Materials in High-Temperature Environments Temperature ratings can range from 50 degrees Celsius (122 degrees Fahrenheit) to 240 degrees Celsius (464 degrees Fahrenheit), depending on the plastic material. High-temperature labels are typically reserved for plastics with a maximum operating temperature of 300 degrees Fahrenheit or higher. Some popular plastic products that fit this range include... Miyuadkai Folding Water Fountain 3.5L, Drink Dispenser Foldable Drink Dispenser Lemonade Juice Beverage Dispenser with Spigot Kettle Camping Water Container Bucket Plastic Travel Car for ...

Often, traditional plastic materials are made more heat-resistant by adding something to them to increase their resistance to high temperatures. Here is a closer look at some of the more popular ...

For even higher temperature applications, we offer ceramic and composite materials such as Macor<sup>®</sup>, Alumina & Boron Nitride which operate at 1000<sup>°</sup>C or more. Each of these materials are suited to ...
