-----  
Where is SPIC solar made?

SPIC Solar currently produces IBC panels and the new TBC product at its two manufacturing facilities, which are located in Xining, Qinghai province, and Xi'an, Shaanxi province. This content is protected by copyright and may not be reused.

How much power does SPIC solar produce?

SPIC Solar has introduced new modules offered in three versions, providing power outputs of 450 W to 460 W and power conversion efficiencies of 22.9% to 23.4%. The open-circuit voltage ranges from 46.8 V to 47.0 V, and the short-circuit current ranges from 12.17 A to 12.37 A.

Why should you choose SPIC solar power?

SPIC has the greatest total installed capacity of solar power in the world and owns a complete industry chain in PV power including R&D, planning and design, manufacturing of polysilicon, cells and modules, project construction, training, etc.

Is SPIC a good company?

Over the past four years, SPIC has been pushing forward quality development of the PV power industry, with a total installed capacity of 35 GW, ranking first in the world.

SPIC Solar is shifting from p-poly IBC to TBC cell technology based products. The ANDROMEDA 3.0 series module portfolio is based on TBC cells with a mass-scale efficiency of up to ...

SPIC has resolutely implemented the important instructions of "securing development in the PV power industry" made by President Xi Jinping when he inspected the Upper Yellow River ...

SPIC Solar Power Division is a wholly-owned subsidiary of SPIC, has the production capacity of N-type TOPCon, P-type PERC, N-type IBC cells and module product at the same time, ...

Company profile for solar panel manufacturer SPIC New Energy Science and Technology Company - showing the company's contact details and products manufactured.
