PLATIO is a design paving solution that makes the solar technology part of modern architecture. By using recycled materials for its production, we provide clean energy for cities, buildings, homes and ...

Unlike traditional PV panels that occupy valuable rooftop space, our PV floor offer a dual purpose, allowing building owners to harness solar energy without sacrificing amenity space. These anti-slip, ...

Whether you're looking to enhance a flat roof, decked area, driveway, patio, or balcony, Solar Pave has the perfect solution for you. To lead the way in transforming urban landscapes and rural ...

PLATIO solar paver is a walkable, green building material. In our solar pavers, high-performance solar cells collect the solar energy radiated onto the surface. The solar cells are protected by heavy-duty, ...

The photovoltaic flooring of Solar Innova can be installed in replacement of conventional pavement. This type of solutions are perfect to be used in urban environments maintaining the aesthetic and ...

Green energy is generated by high-power solar panels installed in the pavement. In contrast to futuristic concepts and prototypes, PLATIO is an existing technology that can be used right now. PLATIO can ...

Platio provides an aesthetic and space-saving off-grid renewable energy system by integrating high-performance solar cells into attractive sidewalk paving elements made of recycled plastic.

It uses high-efficiency photovoltaic cells within a durable, walkable surface. It features a textured, anti-slip finish, ensuring durability and safety for pedestrian traffic.

Problems of limited space are very common, making it difficult for a photovoltaic plant to achieve its production targets, especially on the roofs of apartment buildings or houses. Sun Ballast's Vela ...

Solar pavers are a revolutionary building material that combines the durability and functionality of traditional

Photovoltaic panel factory flat paving

paving with the sustainable power generation of solar panels.
