Eyeing the huge energy potential of the Punjab, the following companies are interested in development of solar/wind power projects (plants) at different locations across the province.

With active facilitation of PPDB, 100 MW capacity grid connected solar power project by M/s. Zhenfa Pakistan New Energy Company (Pvt.) Limited (ZPNECL) at Rakh Choubara, Layyah was developed.

The Bangladesh Power Development Board is inviting bids for the installation of 12 grid-tied solar projects to be located across the country with a combined capacity of 353 MW.

Solar energy offers a clean, climate-friendly, abundant and inexhaustible energy resource to mankind. The costs of solar energy have been falling rapidly and are entering new areas of competitiveness.

Similar to the wind resource, the technical potential of integrating solar PV resources into the power system is assessed by the renewable energy grid integration study conducted by Ceylon Electricity ...

The scholarship focuses on helping individuals with volunteer experience enter or expand their role in the solar PV or solar heating industries through credentialing, Board Certification, and continuing ...

Our PV Design Specialist (PVDS) Board Certification recognizes the advanced experience and skill of PV system designers. This Board Certification demonstrates your proven ability to configure the ...

Punjab Power Policy 2009 provides a framework for the development of power plants in both public and private sector as well for joint venture projects. The policy is intended to promote all types of ...

The Bangladesh Power Development Board has again extended the deadlines for its three tenders floated to build solar power plants with capacities between 10MW and 100MW as no ...

Most on-site renewable energy projects follow a common project development pathway from a project's conception to its completion. This page outlines the major steps you will take along ...
