-----

This initiative focused on overcoming key barriers hindering private investment in Mauritania's nascent renewable energy sector. A risk analysis identified key concerns for ...

Mauritania has taken a new step in its energy strategy, signing two public-private partnership agreements in Nouakchott on Friday, September 12, for the construction and operation of ...

Estimates for solar energy and wind energy production in Mauritania vary, but all recent studies agree that Mauritania has enormous potential for both solar and wind energy because of its ...

This new IEA report - the first focusing on Mauritania - explores the potential benefits to Mauritania of developing its renewable energy options and includes an analysis of the water requirements of ...

A major investment in wind energy infrastructure in Mauritania could not only provide a significant source of renewable energy for the country, but also make a significant contribution to global efforts to ...

Mauritania has signed its first public-private partnership (PPP) in the energy sector for the construction of a hybrid solar and wind facility.

Featuring an impressive 160 megawatts (MW) of solar power, 60 MW of wind energy, and a robust 370 megawatt-hours (MWh) battery storage, this project is not just a power plant; it's a ...

There is also potential to further electrify energy uses in mining. The government has announced various export-oriented projects to produce renewable hydrogen, ammonia and/or hydrogen-reduced iron.

Indeed, in Mauritania, sunshine and wind complement each other, providing the country with the necessary assets to implement the energy transition that has been underway for nearly a ...
