Are microgrids coming to Florida?

Florida is the most hurricane-prone state in the US, vulnerable to an average \$15.4 billion in storm damages annually. So it's perplexing that state government hasn't made at least as much fanfare about microgrids as places like California and New Jersey. But even if its government isn't leading the way, microgrids are cropping up in the state.

Are microgrids a good idea?

However, microgrids are just one way to improve the energy resilience of an electric grid and they do have some potential disadvantages: Depending on the complexity, microgrids can have high upfront capital costs. Microgrids are complex systems that require specialized skills to operate and maintain.
