Does Ottawa have a battery energy storage plan?

In 2025, the City of Ottawa established official plan and zoning provisions for battery energy storage use in accordance with new Official Plan policy. BESS is an emerging technology using batteries and associated equipment to store excess energy from the electrical grid, which can then discharge energy in periods of high demand.

How will a battery storage project benefit Ottawa?

The battery storage project alongside the six solar projects Council supported earlier this fall will reduce the city's reliance on expensive gas-fired electricity during peak demand and strengthen Ottawa's ability to meet its climate and energy commitments.

Could a battery energy storage site be in Ottawa's West End?

With files from CTV News Ottawa's Kimberley Fowler a proposed battery energy storage site in the city's rural west end was at the center of discussion during an open house on Sunday, with concerned residents coming to head-to-head with the company spearheading the project.

Is Ottawa looking at regulatory changes around battery energy storage facilities?

Ottawa is looking at regulatory changes around these types of facilities. (Ross D. Franklin/The Associated Press) UPDATED: City councillors unanimously approved the new rules for battery energy storage facilities at their meeting on Feb. 12, 2025.

The project can store 250 MW of electricity, making it the largest battery energy storage system proposed in the Ottawa area so far. A 250 MW battery can supply enough power at one ...
