Can a lithium ion battery be shipped on a passenger aircraft?

All other lithium metal cells and batteries can only be shipped on a passenger aircraft under exemption issued by all States concerned. Lithium-ion batteries (also abbreviated as Li-ion batteries) are secondary (rechargeable) battery where the lithium is only present in an ionic form in the electrolyte.

Do lithium ion batteries need hazard communication?

o Per special provision 181 in § 172.102, a package containing both lithium ion and lithium metal batteries must include hazard communication for both battery types (See Guide 07 for Lithium Metal Battery hazard communication requirements).

Can a lithium battery be shipped with other hazardous materials?

Lithium metal cells and batteries must not be packed in the same outer packaging with other hazardous materials. A shipment that exceeds the quantity limitations in the table, the overpack limit, or consignment limit, must be shipped as a fully regulated lithium metal battery (See Guide 05 for provisions).

Do I need a specific lithium battery Shipping Class?

FedEx Ground strongly recommends that anyone shipping lithium batteries take a specific lithium battery shipping class in order to better understand these complex regulations and meet DOT/ICAO/IATA/IMDG/USPS requirements.

In the past few months, Gard has received several queries on the safe carriage of battery energy storage systems (BESS) on ships. In this insight, we highlight some of the key risks, regulatory ...

Recommendation - On-Deck Stowage Only: It is recommended that all containers with lithium-ion batteries, especially UN 3480 and UN 3536, be stowed on deck only.

If the Watt-hour rating isn't clearly marked on your battery case, and the information isn't included on a battery specification or Safety Data Sheet, you can simply determine the battery's Wh-rating by ...

Solar container communication station lithium-ion batteries do not require land acquisition

Each distinct shipping guide in this document refers to the regulatory requirements for a specific lithium cell/battery type, configuration, and size. In this way, a shipper will easily find the applicable ...

These lithium batteries may be poorly designed, have little protection, and/or contain manufacturing flaws. It is important to verify the batteries planned for shipment have been safety-tested. A lithium ...

Some batteries are regulated when shipped or offered for transportation. If the battery is restricted, then all applicable hazardous materials regulations must be met. This guide provides information to assist ...

In accordance with Special Provision A201, lithium metal cells or batteries that meet the specified quantity limits may be shipped on a passenger aircraft under an approval issued by the authority of ...

Containerized lithium-ion batteries to store and supply electricity. These containers are designed to be easily transportable and can be installed in various locations depending on th

A Higher Wire system includes solar panels, a lithium iron phosphate battery, an inverter--all housed within a durable, weather-resistant shell. Our systems can be deployed quickly ...
