The new Center survey asked Americans how common three ...

There's been a decline in the breadth of support for wind and solar power. The shares who favor expanding solar and wind power farms are down 12 percentage points and 11 points, ...

Using data collected from both a National sample as well as an oversample in U.S. Southwest, we examine public attitudes toward the construction of utility-scale solar facilities in the ...

Abstract: This study examines U.S. public sentiment toward solar energy from 2013 to 2022 by analyzing 8 million social media posts using RoBERTa, a transformer-based deep learning ...

The new Center survey asked Americans how common three different types of solar panel developments are in their community: small-scale solar development on homes, somewhat ...

Efforts to deploy wind and solar systems face a rising tide of opposition in towns, counties, and states. Mandates for electric vehicles and electric home appliances are being ...

Our review of the literature finds that local communities have complex, location-specific opinions and attitudes towards solar projects.

Sixty percent of voters now agree that solar power "is affordable," a 6-point increase since 2018. Still, agreement with this, particularly strong agreement, is far lower than many other metrics - including ...

Public sentiment shapes the future of renewable energy adoption, influencing policies and projects nationwide. Using over 8 million X (Twitter) posts from 2013 to 2022, we measure "solar sentiment" ...

Support for solar electricity has declined by 8% since 2013, according to a recent RFF poll. Polling from Resource for the Future (RFF) reveals that the popularity of solar power among the ...

Solar power generation public opinion

Public acceptance and support for solar are important determinants of the low-carbon energy transition. Opinion polls tend to indicate that solar energy enjoys a high level of...
