The breathable and lightweight material ensures you're not weighed down by bulk.

How long does a heated vest last?

Battery life: Typically, these heated vests are powered with rechargeable lithium batteries that can provide anywhere from two to 16 hours of heat, depending on the heat level or if you are using the battery pack to charge your phone as well. You can also buy an extra battery for longer heating times.

Do heated vests keep you warm?

The best heated vest to keep you warm often depends on how low the temperatures dip in the region, how long you will be out in the cold, and how much supplemental heat you need to feel comfortable. Battery runtime was tested at the highest temperature--you can reasonably expect two to three times longer heating on lower settings. Battery included?
