The Hai Long Offshore Wind Project (hereinafter referred to as the Hai Long Project) today held its First Power Ceremony, officially announcing the successful completion of energization ...

In November 2016, it won the honor of caring for the next generation of caring enterprises. On May 3, 2017, it was successfully listed in the national share transfer system for small and medium-sized ...

The 1-GW Hai Long offshore wind project in Taiwan on Thursday held a first power ceremony to mark the completion of energisation tests in May and the first delivery of electricity to ...

Located approximately 45 - 70 kilometers off the Changhua coast in the Taiwan Strait, Hai Long consists of two phases, Hai Long 2 and Hai Long 3, with an expected combined generating capacity ...

Product feature. The new energy prefabricated substation is a combined transformer for wind power (solar power generation), which is a step-up transformer body, switchgear, high-voltage current ...

By the end of 2024, our country's renewable energy installations had a total capacity of 21,067MW, of which the hydropower is 2,123 MW, geothermal power is 7 MW, solar power is 14,281 ...

Construction underway for the Hai Long Offshore Wind Project, a 1GW+ clean energy game-changer for Taiwan. Developed by Northland Power, Yushan Energy, and Mitsui & Co.

The 1 GW Hai Long offshore wind project, jointly developed by Northland Power, Gentari, and Mitsui & Co., has produced its first power, marking the successful energisation of the project and ...

We aim to commence grid connection and power generation in 2025 and 2026, respectively, establishing Hai Long as the largest offshore wind farm in Taiwan and the Asia-Pacific ...

Solar power, also known as solar electricity, is the conversion of energy from sunlight into electricity, either

Tailong Solar Power Generation

directly using photovoltaics (PV) or indirectly using concentrated solar power.
