Overview History and discovery Range Regions Types of radiation See also External links The electromagnetic spectrum is the full range of electromagnetic radiation, organized by frequency or wavelength. The spectrum is divided into separate bands, with different names for the electromagnetic waves within each band. From low to high frequency these are: radio waves, microwaves, infrared, visible light, ultraviolet, X-rays, and gamma rays. The electromagnetic waves in each of these bands have different characteristi...

Radio waves, at the low-frequency end of the spectrum, have the lowest photon energy and the longest wavelengths--thousands of kilometers, or more. They can be emitted and received by antennas, and ...

Take your vocabulary to the next level with this list, featuring 13 of the longest words in the English language.

Radio waves are the electromagnetic waves with the longest wavelength, ranging from about 1 millimeter to kilometers. This makes option C, radio waves, the correct answer. They are ...

Uncover the truth behind the longest word in the English language, a massive 189,819-letter chemical name. Learn what it means, why it's so long, and whether it's truly considered a "real" ...

"Longest." Vocabulary Dictionary, Vocabulary , <https://> Accessed 05 Feb. 2026. Copy citation Examples ...

There are about a million words in the English language, but do you know the longest word in English? You may think it's antisestablishmentarianism, at 28 letters long.

The different wavelengths of visible light are seen as the colors of the rainbow: red, orange, yellow, green, blue, indigo, and violet. The longest wavelengths (around 700 nanometers) ...

Red light has the longest wavelength and lowest frequency while purple light has the shortest wavelength and highest frequency. The electromagnetic spectrum (or more commonly known as the ...

The longest wavelength are called

So when we talk about the light with the longest wavelength, we're actually talking about waves that carry less energy but have the power to travel huge distances and penetrate obstacles. ...

The part of the electromagnetic spectrum with the longest wavelength and lowest frequency is radio. The portion with the shortest wavelength and highest frequency is gamma radiation.

Today marks the anniversary of the longest birthday, with one man travelling around the world to keep his big day going for a whole 48 hours. On 3 February 2018, Paul Morgan (USA) ...
