Julian Brown, a 21-year-old inventor from Atlanta, has built a solar powered pyrolysis machine that turns scrap plastic into fuel. This is a rough, hands on build made with ingenuity and a ...

Brown, a young Black inventor from Alabama, created Plastoline, a solar-powered microwave pyrolysis reactor that turns plastic waste into usable fuel. Brown, known as NatureJab, ...

After 5 years of work and 8 months of relentless upgrades, the world's first solar, continuous, microwave pyrolysis reactor--Mark 4.5--is finally here. This revolutionary invention can...

At 17, he constructed his first plastic-to-fuel reactor, driven by a vision to combat the growing menace of plastic waste. Over the years, what began as a high school project has matured ...

At a lab in Singapore, a team of chemists stared down one of the modern world's most persistent enemies: polyethylene, the ultra-stable plastic that wraps our groceries, clogs our oceans, ...

At the fourth Renewable Energy Investor Meet in Gujarat, Prime Minister Narendra Modi was presented with a groundbreaking innovation - the world's first solar tile made from plastic waste.

This unique solar tile, designed by entrepreneur Shani Pandya, ingeniously repurposes over 350 single-use plastic wrappers into a functional energy source. Each tile generates 20 watts of ...

In this case we decompose scrap plastic into what it was made from: natural gas and petroleum. His facility is one hundred percent solar powered. The battery is a 100 kWh Komodo ...

A groundbreaking innovation has emerged from Atlanta, where a young inventor has harnessed the power of solar energy to create a machine that transforms discarded plastic into ...

The world s first solar plastic power generation

Julian Brown's successful test run of his plastic-to-fuel reactor, a growth that has garnered significant attention. Brown's innovative device, dubbed the Solar Continuous Microwave ...
