Is it possible to pass parameters with an HTTP get request? If so, how should I then do it? I have found an HTTP post requst (link). In that example the string postData is sent to a webserver. I ...

What is confusing you? You evidently know what .get invoked on a dictionary does, that"s what"s being called for each key in the dictionary.

The "get" lets you treat a class method, as if it were a simple property in an object. If you leave off the "get", you can still access the value by calling .area () instead of just .area

Here the get method finds a key entry for "e" and finds its value which is 1. We add this to the other 1 in characters.get (character, 0) + 1 and get 2 as result.

In this step-by-step guide, we"ll walk you through everything you need to know about solar PV system installation--from the initial consultation to the moment your system is up and running.

Solar & roofing installation services Lower your electric bill, gain energy independence, and protect the planet with a home solar power system.

Where to get the project for photovoltaic panel installation
